PRESENTATION

I am a student in computer science engineering. I like software development.

HARD SKILLS

Programing :
- C, C++, Arduino, Python, MYSQL, HTML/CSS/JS, PHP, React, Symphony.

Software techniques :
- office, Fusion360, Revit, Packet Tracer.

LANGAGES

Français, native.
Anglais B1. Score TOEIC : 700.
Espagnol occasionally.

LOISIRS

Juggling
Video-games
Hiking
Cycling

INTERNSHIP SOUGHT

20 weeks internship, from september 2022 to february 2023 ,In computer science.

WORK EXPERIENCES

2022 : 15 weeks internship, at <u>Leviathan Dynamics</u> in multi-task developer.Automatisation with Python: Compressing data, sending data with a secure 4G communication, interpret data and Show them on a website with graphics.
2021 : 15 weeks internship, remote only in a Web Development company.Creation of sites in HTML/CSS. Contribution in the conception of a site with REACT and Symfony.
2016 : one week internship at Safran Nacelles, Pont-Audemer to discover different works and life in a company.

SCHOOL PATH

2019 : Bac S spé Math
2019 : Entry into preparatory class integrated at CESI Lyon
2021 : Entry into engineering course specialized in computer science.

PROJECTS DURING THE FORMATION

3rd Year :
- Creation of an application with C#.
- SI architecture.
- Big data with Hadoop

2nd Year :
- Creation of a website in HTML, CSS, PHP, JavaScript.
- Network management with packet tracer.
- Inventory management application with C ++ and MyForm.
- Weather station with Arduino.

1st Year :
- Modeling and production management with MySql.
- Construction / Thermal.
- SI with python.
